

To whom it may concern,

There is no reason to limit or stifle any program on XM Radio. I drive over an hour to work every morning and I listen various stations. Now I have paid for my services that I receive from the satellite radio. I deserve to get local news and weather. Why don't you take the time to listen to what local FM stations play. There is less variety and the stations are limited to the area that they target. I have had stations I like on FM radio that I don't receive anymore due to their satellite relocations. Now why did they relocate and redistribute their signals? To bring in more listeners that they didn't have before. But they have forgotten about all the listeners they have lost in doing this. So I went the route that I did now I have the FREEDOM of listening to what it is I WANT to listen too. Without annoying commercials or any other interruptions!!! Who are you too take this away? They satellite radio industry be it XM, Sirius or any other has the right to carry local news and weather! The only reason you want this changed is to keep more money in your greasy palms. That's all you see is dollar signs. Like anything else in this country you get what you pay for. I don't pay for FM radio and it's crummy. I pay out of my own pocket for XM and it is the greatest thing I could have ever spent my money on! I guess what I'm saying is it's not your decision to make when it comes to what XM offers for its channels! It is OUR decision! The listeners! And I hope that we band together and crush this petition. Amid all the scams now that we deal with for instance (Spam) on the internet or junk mail I receive daily we put bills in to stop these from interrupting the services we pay for so why don't we stop this bill! I can insure you that if this bill is passed and my congressman votes or signs on to it then I WILL NOT VOTE again for them.
